UL CERTIFIED FIRE-RESISTANT CABLES

600/1000 V | Power & Emergency Circuits

Certificate #: UL-US-2429684-0

Issued To: Fast Cables Limited

Fire resistant cables are designed to maintain circuit integrity and electrical continuity under defined fire conditions, enabling continued operation of critical systems while limiting flame spread and supporting life safety applications.

Certified Product Range

- Rated Voltage: 600/1000 V
- Conductor Material: Copper (Class 2)
- Core Configuration: 2 Core, 3 Core, 4 Core
- Conductor Size Range: 10 mm² to 400 mm²
- Temperature Rating: Tested to withstand fire exposure up to 950°C for 3 hours

Fire Performance & Compliance

Cables have been tested by UL Solutions for reaction to fire and fire resistance performance in accordance with the following international standards:

- BS 6387:2013 – Categories CWZ (Fire with water and mechanical shock)
- IEC 60331-21:1999 – Fire resistance of electric cables
- EN 61034-2:2005+A2:2020 – Smoke density
- EN 60754-1 & EN 60754-2 – Halogen acid gas content and acidity
- EN IEC 60332-3-24:2018 – Flame spread of vertically mounted bunched cables

Continuous Quality Assurance

- Subject to 4 periodic surveillance and follow-up audits per year by UL Solutions
- BASEC-certified manufacturing facility
- In-house laboratories accredited to ISO/IEC 17025
